Dear Sir:

RESPONSE

This is in response to the Office Action mailed January 31, 2003 in the above-identified patent application.

In the Claims:

Please amend claims 1 and 11 as follows.

1. (Amended) A method of controlling a vehicle comprising:
- providing a driver subsystem and an active assist subsystem;
 - receiving at least one driver input into the driver subsystem from a driver of the vehicle;
 - outputting a driver output from the driver subsystem to the active assist subsystem, the driver output being derived from the at least one driver input;
 - providing at least one active assist program having at least one active input, the at least one active assist program having an on setting wherein the at least one active assist program outputs at least one active input and an off setting wherein the at least one active assist program does not output at least one active input;
 - providing a vehicle control and implementation subsystem; and
 - inputting an intended driving demand from the active assist program into the vehicle control and implementation subsystem;
